## KG Technologies REACH Statement

The REACH regulation provides that Substances of Very High Concern (SVHC) are subject to a specific authorization. The Article 33 of REACH requires manufacturers and importers to notify European users about the presence of substances of concern when their concentration is or exceeds 0,1% (w/w).

The current candidate list can be found on the European Chemicals Agency Website:  
<https://echa.europa.eu/candidate-list-table>

Based on the material content certifications provided by KG Technologies' suppliers, none of these substances are present in the materials we use in our products or manufacturing processes, including packing and shipping materials. Therefore, KG Technologies' products do not contain any of these SVHC exceeding 0.1% (w/w).

KG Technologies are committed to meeting the requirements as set out in Article 33 of REACH and continue compliance efforts including monitoring REACH regulatory developments, and duly will notify customers of any change in article content.

Hugo Steyn  
Vice President of Engineering
